A SIMPLE GUIDE TO STREAMING TV

Streaming TV lets you watch your favorite shows, movies and sports over the internet instead of relying on traditional cable service. With South Slope internet, you're ready to dive into the world of streaming. Here's a simple step-by-step guide to help you get started:

- 1. Choose your internet speed:** A smooth streaming experience depends on having enough speed for both streaming and other online activities. To find the right internet speed for your household, take the quiz at gostreamnow.com/southslope.
- 2. Explore streaming options:** There are plenty of streaming services to choose from, offering live TV, on-demand content, or a mix of both. Popular options include Netflix, Hulu, Amazon Prime Video, Disney+, and YouTube TV. Some services require a subscription, while others are free. Compare options at gostreamnow.com/southslope.
- 3. Set up your streaming device:** If you have a smart TV, you're already set up for streaming. If not, you'll need a device like a Roku or Amazon Fire TV Stick. Plug it into your TV's HDMI port, connect it to your South Slope internet, and follow the setup instructions.
- 4. Create and activate your account:** After choosing your streaming service, create an account online with an email and password. Then, download the app on your device, log in, and you're ready to start streaming!
